

We're Hiring: Design Focused Front-End Developer

If you love designing and implementing easy to use, elegant tools used by hundreds of thousands of passionate people, I have an incredible opportunity for you!

We're looking to hire a full-time front-end developer to make our marketplace & tools for content creators more intuitive.

Job details:

Salary: \$40,000-120,000 + performance bonuses (Depending on experience & skills)

Position: Full-Time (remote)

Mission: Create the most intuitive video editing tool UI's in the world

Our current site: promptedit.com

Here are examples of UI's we are impressed by:

- [Epidemic Sound](#)
- [Motion Array](#)
- [Artlist](#)
- [Higgsfield](#)
- [Envato Elements](#)

You'll be the design and UX lead as well as a front-end developer on the dev team. We currently have 4 people on the dev team, and we're looking to grow this team to 6 to 7 devs in total.

We use Tailwind for styling. It's important that you want to use Tailwind. Ideally you're comfortable skipping the design step in tools like Figma, and do the design and implementation straight in Tailwind and HTML one step.

The rest of our tech stack includes Laravel, Vue, TypeScript, Inertia, PostgreSQL, AWS, Typesense.

We're an online marketplace for video content creators. Our biggest focus currently is building out our AI offering. So a lot of your work will focus on figuring out good UIs for our users to interact with tools like Veo, Nano Banana, KlingAI and other video and image generation models, while the rest of the team is focusing on integrating these AI APIs.

We also need to make our site mobile responsive. It's not currently.

We also have [extensions](#) for DaVinci Resolve and Adobe Premiere Pro, which you'll update the designs of. These are built with React and Tailwind.

How to Join The Team:

We're not looking for an impressive résumé... we're looking for developers who *can CREATE*.

Essentially... prove to us you can design & create a page on our site that is more intuitive and better than we made it!

Step 1: Start by creating a performant sales page that sells joining our marketplace. Here is an example of our existing sales page you can use for inspiration:

<https://www.contentcreator.com/prompt-edit>

Step 2: When you're done designing and creating the new homepage publish it on any domain and apply using this form:

<https://docs.google.com/forms/d/e/1FAIpQLScIRirKbHdJTFL0aysW2rmkO9B9a-Jd4FeENpGeYu4Mmm8KNQ/viewform?usp=publish-editor>

This is your chance to make a living doing what you love!

We will be reviewing submissions as they come in so if this is exciting to you, get your sales page redesign done as fast as possible!

If you have questions about the role and opportunity please email support@contentcreator.com and I will personally answer them for you.

Let's build the best AI tool & video editing template marketplace together!

All the best,

Paul Xavier
